IT'S TIME
to end damaging commercial netting in the Great Sandy Marine Park!

STOP COMMERCIAL NETTING IN THE Great Sandy Marine Park!

The Great Sandy Marine Park is **THE ONLY** Marine Park that allows commercial netting in what "should be" TRUE YELLOW CONSERVATION ZONE AREAS!

Ending damaging commercial netting in the Great Sandy Marine Park - which has already been tentatively listed as a World Heritage Area, will bring a much needed boost to an environment deserving of proper marine protection.

USING COMMERCIAL NETS TO:

- Target spawning aggregations
- Target bream, whiting and flathead in conservation park yellow zones
- Target top level predators like mackerel, trevally, barramundi, threadfin salmon and shark
- Target low food value but high recreational fishing value fish like Golden Trevally, Snub nosed dart (Permit), Queenfish, Giant Herring etc.
- Incidentally catch dugongs and marine turtles

MUST BE STOPPED

Sign this PETITION to request the Palaszczuk State Government to commit to ending destructive commercial netting operations in the Great Sandy Marine Park and adjacent waterways to restore fish stocks and help protect the Queensland urban coast's largest dugong population.
